

# Dalbury

Built on the innovative Nissan NV200

## The Dalbury is a versatile micro campervan, ready for your next adventure whether it's climbing mountains or just a trip to the shops.

With great fuel consumption, a smooth driving experience and the option to go all electric, the Dalbury is highly versatile for its size.

The Dalbury is a versatile 2 berth micro campervan based on the Nissan NV200. It comes with the traditional side conversion featuring a well equipped kitchen for it's size, an easy to use rear seat/ bed and an elevating roof that allows for more standing space.

Like many of our campers, the Dalbury, is ideal not just for camping but also as an everyday vehicle. It drives just as well as a car, effortlessly keeping up with modern driving conditions. It also has great fuel consumption and is capable of fitting in a medium sized garage with its compact size of only 4.4 meters. Although it is compact, the Dalbury comes with a front passenger swivel seat

that spins to form a comfortable dining area. The table slots easily in place, and is stored out of sight when not in use. The rear RIB seat/bed is comfortable and sculpted whilst driving and in the evenings it's capable of converting to form a completely flat bed for a great nights sleep.

The Dalbury also features an underbody water tank and low voltage LED lighting throughout. The kitchen area boasts a 39-litre fridge, a sink and a 2 ring hob that is hidden under a unique sliding worktop compartment, along with plenty of storage space in the cupboards.

# Love & care

Of course all of our Dalburys benefit from being built with some of the latest CNC technology, allowing us to flawlessly cut out the furniture before our expert craftsmen, each with a passion for the industry and years of experience, hand furnish the vehicles with great love and care.

Here at Hillside Leisure we have no hidden extra costs. We are upfront with pricing, with everything included in the price quoted. You can rely on us to provide outstanding customer service and vehicles that are second to none. Feel free to give us a call, send us an email or pay us a visit to test drive your new camper.

The Dalbury also comes with the option of being built on the all-electric ENV200, the worlds only fully electric and eco-friendly production campervan, with upto 106 mile range, capability for 80% charge in half an hour with rapid charging, low running costs and an amazingly smooth driving experience.
